

# Gauss-constrained equilibrium screen at fugacity 1

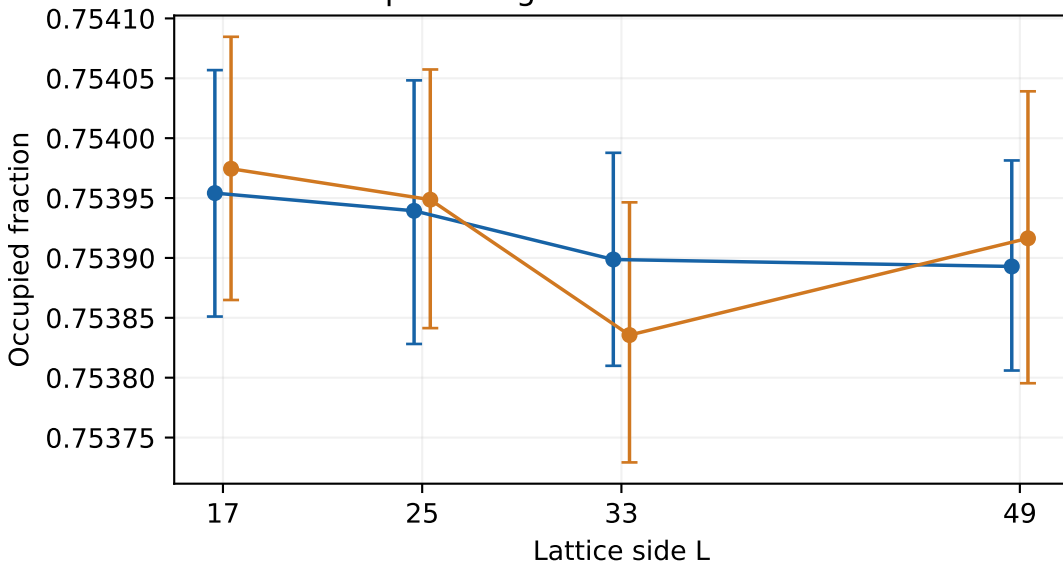

## Axis modes (1,0,0) and (2,0,0)

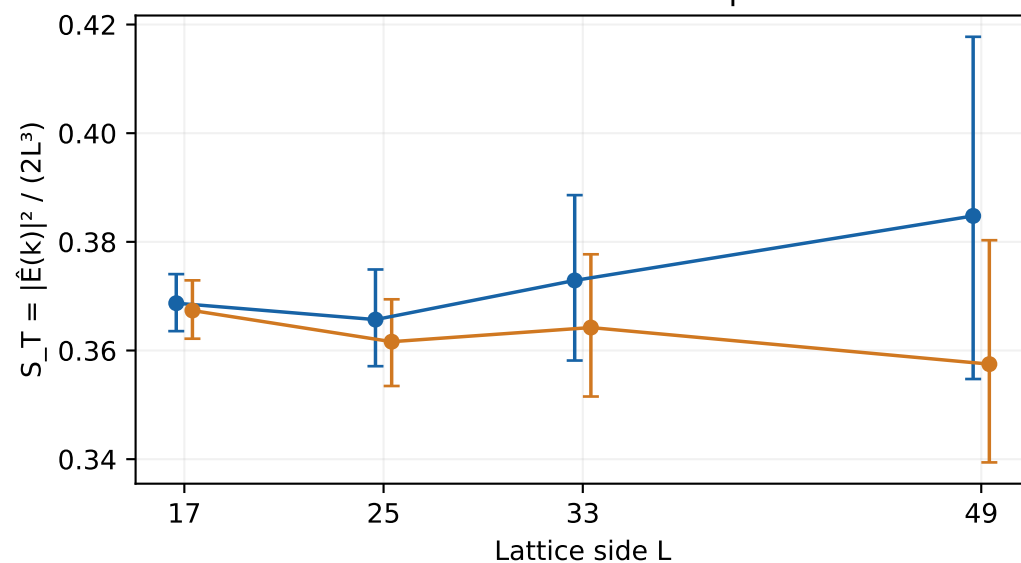

## Diagonal modes (1,1,0) and (2,2,0)

## Occupation agrees across initializations

## Lowest axis-mode transverse spectral trace

Author follow-up:  $10^9$  production attempts per chain. Bars: paired 1024-sample block bootstrap.  
Serial dependence and equilibration are not certified; no phase or physical formation-state claim.
